Packaging and loading of all equipment and furniture, specialist equipment packed separately

Transport to new premises or to temporary storage facility

Unloading, locating & installing equipment & furniture at the new premises

Recommissioning of all specialist equipment, including IT/telecoms setup

Client Case Study

COMPANY: Large MNC Tech Firm

LOCATION: Dublin, Ireland

WHAT WAS INVOLVED:

A multinational tech firm aimed to streamline operations by relocating from two offices to a new Dublin City campus, incorporating hybrid work and hot-desking. The complex move involved relocating 800 staff initially and then 1,000 workstations and equipment. Hybrid and hot-desk options were introduced, offering various desk facilities.

Services included IT disconnection/reconnection, with a focus on accuracy using pre-printed move labels. Approximately 1,000 pedestals were removed, and careful scheduling ensured minimal disruption. The entire 5-day relocation was seamless, thanks to coordination with staff working from home on specific days, ensuring uninterrupted business operations.
